### Identificação das Correias Automotivas Dayco

#### Correia em V

10 A 0915 C

10A: Perfil (Largura em mm)

0915: Comprimento (em mm)

#### Correia em V – dupla

2X 13 A 1025 C

2X: Dupla

1025C: Comprimento (em mm)

13A: Perfil (Largura em mm)

Tem a função de manter o funcionamento dos acessórios do veículo, tais como, Alternador, Direção Hidráulica, Ar Condicionado, Bomba D'água e outros.

#### Correia Poly V

5 PK 1250

5: Número de Ribs

PK: Perfil Automotivo

1250: Comprimento (em mm)

#### Correia Poly V – dupla

6 PKK 1195

6: Número de Ribs

PKK: Perfil Automotivo, com Ribs nos dois lados

1195: Comprimento (em mm)

Tem a mesma função da Correia em V, com as novas tecnologias dos motores a correia Poly-V veio para substituir a Correia em V, por ter a capacidade de agregar mais acessórios e trabalhar também com as costas da correia.

#### Correia Sincronizadora (Dentada)

173 SHPN 180 H

173: Número de Dentes

SHPN: Perfil dos Dentes

180: Largura da Correia (em 1/10mm)

H = HNBR  
Material de alta temperatura

#### Correia Sincronizadora (Dupla Dentada)

097 SHDD 150 H

097: Número de Dentes

SHDD: Perfil dos Dentes Dupla Dentada

150: Largura da Correia (em 1/10mm)

H = HNBR  
Material de alta temperatura

Tem a função de manter o sincronismo do motor, entre o Comando de Válvulas e a Árvore de Manivela (Virabrequim), mantendo um perfeito funcionamento do motor, garantindo uma ótima queima do combustível, torque e potência.

#### Controle de troca da correia

A embalagem da correia sincronizadora contém uma etiqueta destacável onde constam quilometragem e data para a próxima troca. É muito importante controlar a quilometragem para a troca da correia. Oriente seu cliente / aplicador.

 CORREIA DE DISTRIBUIÇÃO		
Trocada em	<input type="text"/>	<input type="text"/>
Km	<input type="text"/>	<input type="text"/>
Próxima Troca KM	<input type="text"/>	<input type="text"/>

**Atenção:**

**Destaque para o controle da próxima troca, segundo as instruções do fabricante do veículo**

## HNBR

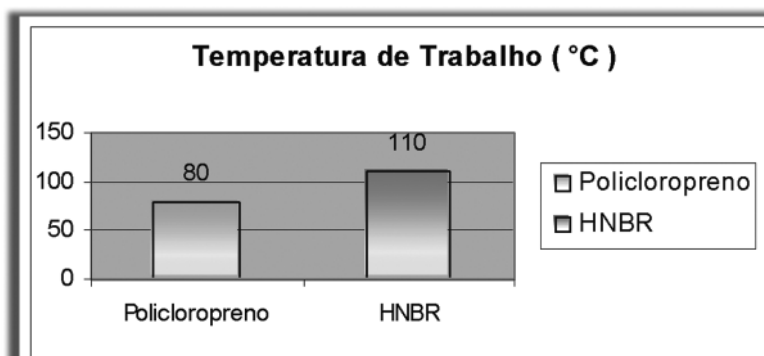

Os novos motores utilizados na produção automotiva trabalham com temperaturas cada vez mais altas devido às maiores taxas de compressão e processos de combustão. Este aquecimento provoca um desgaste mais rápido dos componentes do motor. As correias automotivas, por serem compostas basicamente de borracha são uma das mais afetadas com este processo.

Com o objetivo de prolongar a vida útil deste produto, os fabricantes de correias adicionaram à sua composição uma matéria prima mais resistente à temperatura. Trata-se do HNBR, ou borracha sintética nitrílica hidrogenada, um elastômero de última geração mais resistente ao calor e ao ozônio.

Atenta às necessidades do mercado, a Dayco coloca à disposição dos profissionais, uma linha completa de correias com HNBR. Este composto pode ser identificado através da letra H no final do código Dayco. Vale lembrar que as correias com este composto são realmente mais caras em relação as correias comuns. Por economia, ou desinformação, alguns consumidores ainda preferem utilizar as correias de policloropreno, porém uma vez instaladas nos novos veículos (que utilizam correias originais com HNBR), as tradicionais correias de policloropreno causam sérios danos ao motor, pois não suportam o calor produzido, se rompendo e causando sérios danos ao veículo.

### EXEMPLO:

Corsa Motor 1.0 / 1.4 / 1.6 8V	Correia 111SP170	Ano 94 e 95
Corsa Motor 1.0 / 1.4 / 1.6 8V	Correia 111SP170H (HNBR)	Ano todos
VW / Ford Motor AP 1.6 / 1.8 / 2.0	Correia 121SX180	Ano ... / 97
VW / Ford Motor AP 1.6 / 1.8 / 2.0	Correia 121SX180H (HNBR)	Ano todos

## Correias 158SHPN254H Fiat motor 1.6 16 válvulas

Sempre facilitando e atendendo as necessidades dos aplicadores, estamos informando um problema crítico que ocorre no motor Fiat 1.6 16 válvulas. Mesmo que a correia seja aplicada com as ferramentas necessárias e seja feita a troca do rolamento tensor, existe uma condição chave que envolve a chapa de fixação do prisioneiro. Por se tratar de alumínio o trilho por onde corre o prisioneiro se desgasta deixando o mesmo fora do posicionamento correto. Assim a correia trabalha completamente desalinhada entrando em contato com a roda fônica desgastando sua lateral. A medida da correia original tem 25,4 mm de largura ou seja uma polegada. Já houve casos de correias rodarem com o prisioneiro fora do posicionamento e quando estava com 12,0 mm se partiu causando sérios danos ao motor.

Tratando-se de correias para carros com motores de 16 válvulas, é importante a troca preventiva e a inspeção a cada 20.000Km. Lembramos que é melhor ter um custo de prevenção do que uma despesa bem maior.

## MAXION

A Dayco Power Transmission, baseada em informações da Maxion International Motors, constantes de seus boletins de serviço datados de nov/97, jul/98, abr/00 e ago/00, que visam melhorias de projeto a fim de evitar o desgaste prematuro e rompimento da correia utilizada nos seus motores HST 2.5 Diesel, que equipam os seguintes veículos.

FORD .....	F1000 e Ranger
GM .....	S10 e Blazer
Mercedes Benz .....	Família Sprinter
Land Rover .....	Defender e Discovery

Vem divulgar através deste boletim, modificações e procedimentos importantes que devem ser adotados quando da substituição da correia dentada.

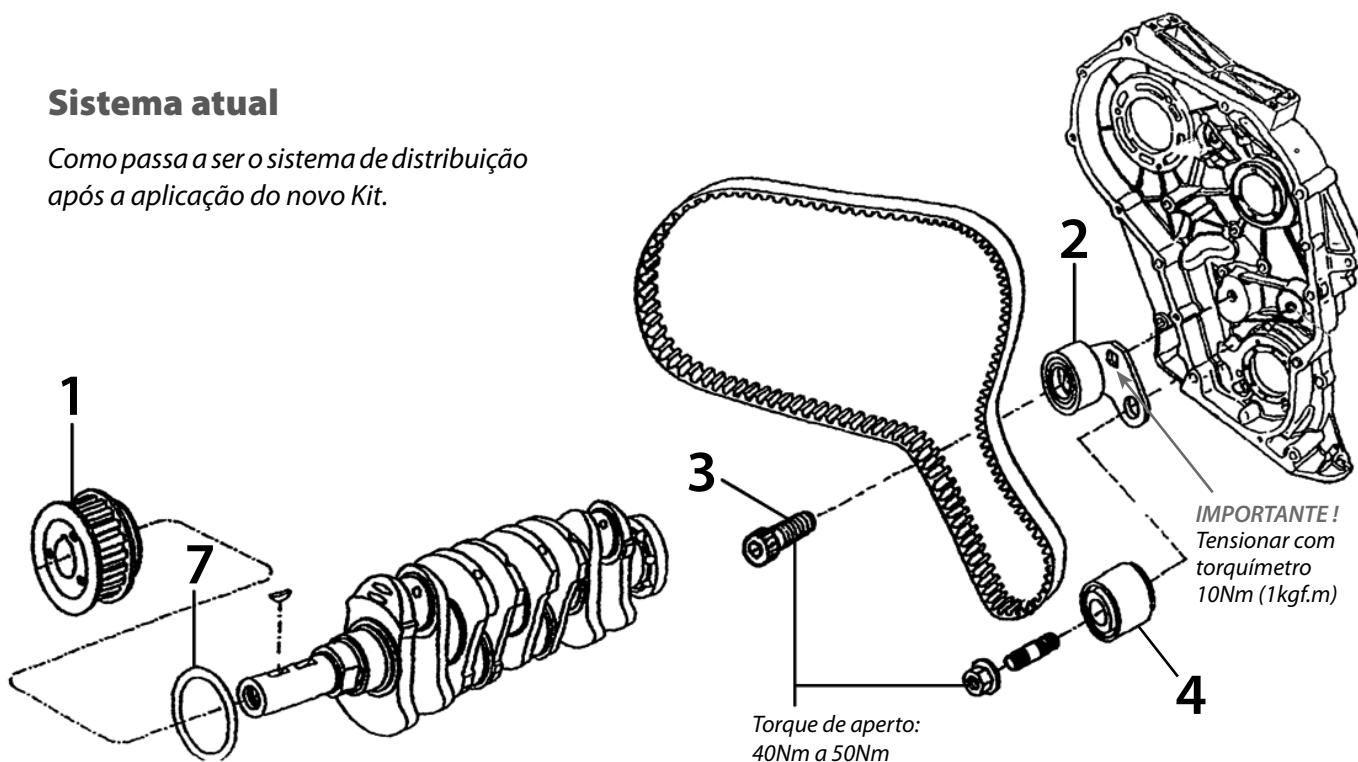

### Alteração no conjunto das polias de distribuição

De Julho/97 em diante, foi introduzido um novo conjunto de polias e nova engrenagem do virabrequim com abas laterais (kit HS500), para motores a partir dos seguintes números de série:

REF.	DESCRIÇÃO	ANTERIOR	ATUAL (HS500)
8969B045107C	1 Polia da distribuição Virabrequim	ERR4707 A Polia sem Guia Lateral	LHH100660 Polia com Guia Lateral
8970B045353C	2 Polia Tensora	ERR1972 A Polia com Guia Lateral	LHP100680 Polia sem Guia Lateral
8984B045280C	3 Parafuso de Fixação da Polia	FB110131 Parafuso M10x75 com Arruela de Retenção	SS110201E Parafuso M10x20 sem Arruela de Retenção
8985B044889C	4 Polia de Distribuição de Giro Livre (Loca)	ETC8560 A Polia Montada com Anel Espaçador	LHV100150 Polia com Anel Espaçador Incorporado
8987B044939C	5 Arruela da Polia Tensora	ERR1973 A Arruela	Eliminar
8A71B045034C	6 Espaçador da Polia Distribuição Giro Livre	ERR1973 A Espaçador	Eliminar
	7 Anel "O" de Vedação	ERR4710 A Anel "O"	ERR4710 A Anel "O"

### Sistema atual

Como passa a ser o sistema de distribuição após a aplicação do novo Kit.

## Procedimentos de Garantia

- 1** Encaminhamento do produto para Engenharia de Qualidade.
- 2** Engenharia efetua todos os testes e emite um laudo.
- 3** Quando comprovado o defeito de fabricação, a Dayco assume todas as despesas com peças e mão-de-obra.
- 4** Quando não se tratar de um defeito de fabricação, a Dayco emitirá um laudo técnico esclarecendo o motivo.

A Dayco através de seus departamentos Técnico e Engenharia de Qualidade, estará à disposição para qualquer esclarecimento ou dúvidas sobre montagem, manuseio e aplicações.

## Certificações

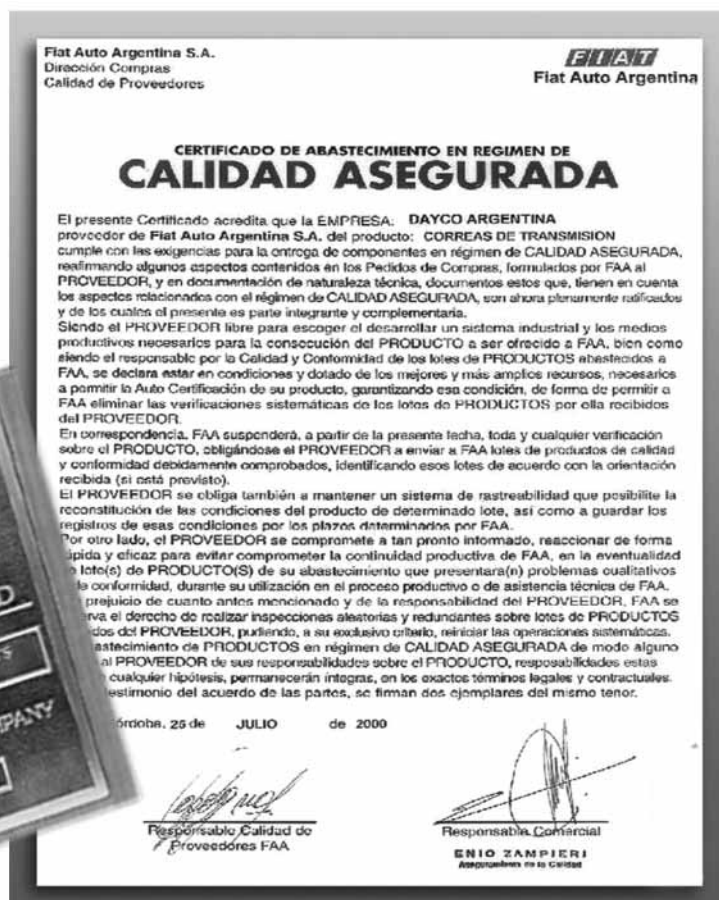

ISO/TS 16949 em 2004

ISO 14001 Meio Ambiente

ISO 9001

QS 9000

AVSQ'94
